

Action plan during transition from mainstream school to specialized groups.

When mainstream schools need a placement for a pupil within a specialized group, outside of the school they apply for it at Central Student Health Care. Depending on the amount of places available the pupil will be offered a place. If the pupil goes to another school he or she always remains a pupil of the mainstream school and the Principle remains responsible for the pupil. Therefore a lot of communication and respect is important between the schools. Every term they have a meeting about the pupil and an action plan is provided. A contract is written and an evaluation about the development of the pupil is also written every year. Parents should also be given the opportunity to voice their opinions but the school makes the final decision.

For the wellbeing of the pupil it is important with these meetings and evaluations in order to achieve the best conditions for the pupil.
