Ergonomics at School

Good ergonomics at school is
important for the welfare of the
pupils and staff

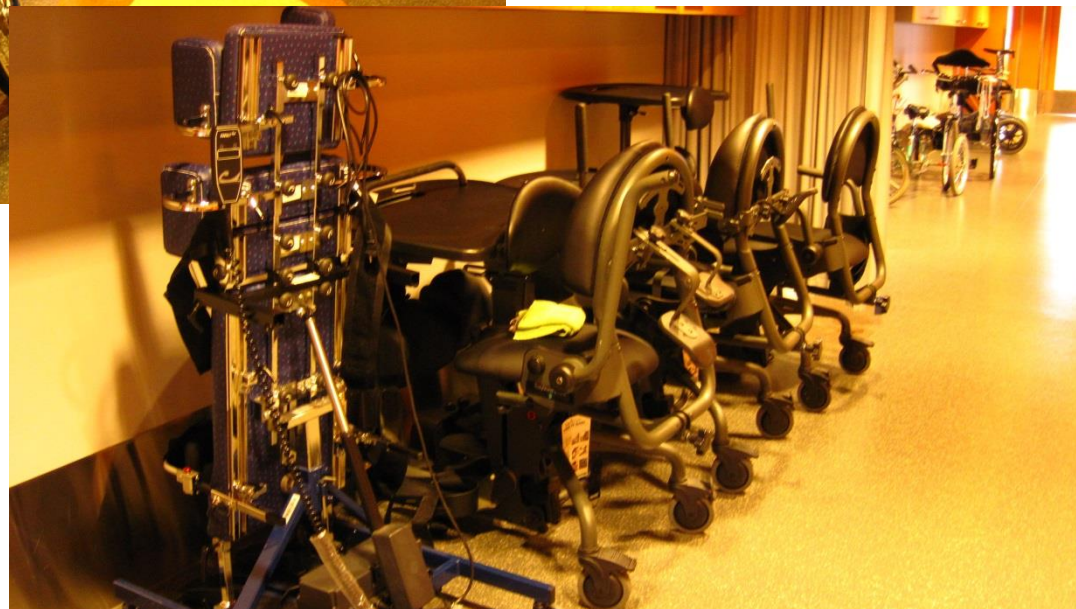

Bypassing on wide corridors is safe and
floor material is slip resistant

For safety two hand rails and marked stairs

Space is needed for tricycles and standing frames

Lightning doesn't dazzle

Accessible sink in classroom

Accessible food service line

Non slip surface trays for school lunch

Home economics class

Adjustable height of stove plates and sink

An oven door –easy to open

Moving from a chair to wheelchair can be done safely by the help of transfer assist device

Choosing a chair is part of the posture care

Chairs for teachers and assistants – wheels under and adjustable height

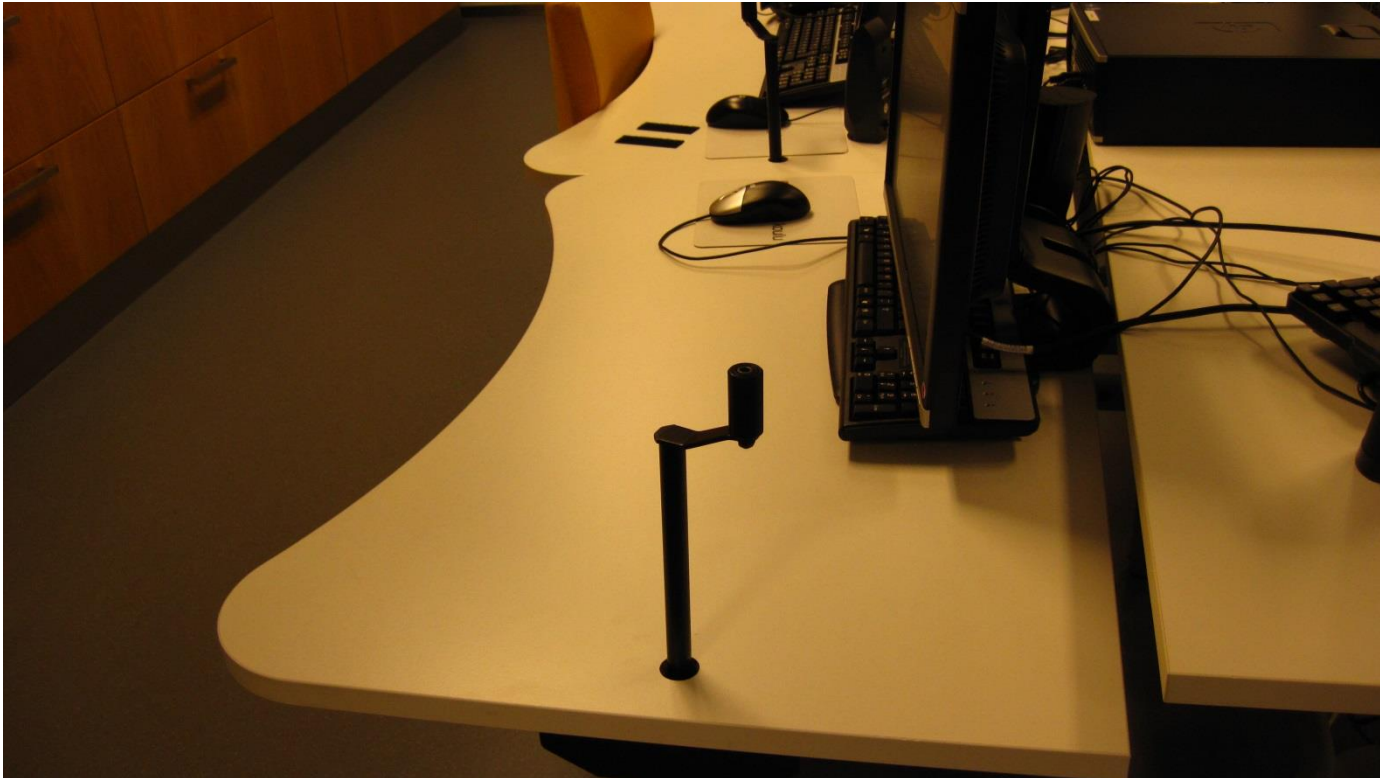

Electricity – long power cord, easy to pull from the ceiling

A pupil's table gives support to sitting position and makes sitting possible in a wheelchair or in a working chair

Accessible table

A book holder for reading ergonomics
