

Information and communication training for the staff

Depending on current needs in school you can make an order to “Konsultativt stöd” if the staff at Storvretaskolan need help with communicating for example with the parents. You can also ask for help from Children’s habilitation at the local hospital. They can come out to the school and organize a shorter education for the staff about adhd and autism for example. This service is for free.

Keywords: Communication, consultation.
