

Professional Teaching for the Staff

At Woodlands ASD Resource Base not only are the staff given the opportunity to seek out training in the local community, we are lucky enough to have key professionals come to us to provide in-house training and education. It is important, especially as professionals in the field of teaching; to continue to seek out as well as accept professional development at any chance we are given. Gianna Colizza, the Head of Woodlands ASD Resource Base has just recently given us two very informative, hands-on and fun feedback and training sessions on the very valuable practical methods and strategies of Gina Davis Attention Autism program. This program is designed to help the child with Autism learn and flourish in a simple, effective and fun way!

Further examples of professional teaching for the staff at Woodlands ASD Resource Base:

- Safeguarding training
- PIVATS Assessment training
- Team Teach training
- Makaton training
- Attention Autism feedback seminar
- Mentoring from the Head of Woodlands
